

Disposable EEG Cup+ Electrode Silver/Silver Chloride

Technomed understands the importance of clear signals, efficiency and ease of use.

Technomed's Disposable Ag/AgCl EEG+ Cup Electrode due to a larger dome holds a higher volume of conductive material. It optimizes EEG procedures and enables focusing on the patient and the EEG recording.

The electrode is designed with flexible wires and connector optimized for easy headbox insertion and extraction.

User Benefits

- No cleaning and preparation of EEG electrodes needed
- Clear and reliable signal due to optimized layer of frequency stable Ag/AgCl
- Optimized signal quality due to larger electrode surface and volume
- Short cup-to-cable connection to reduce lift risk
- Optimized connector for easy headbox insertion and extraction
- Optimal patient comfort with low profile disk, soft and flexible anti-tangle lead wires
- Reduced risk of cross-contamination
